SKYDECK

THE WORLD

IS WAITING

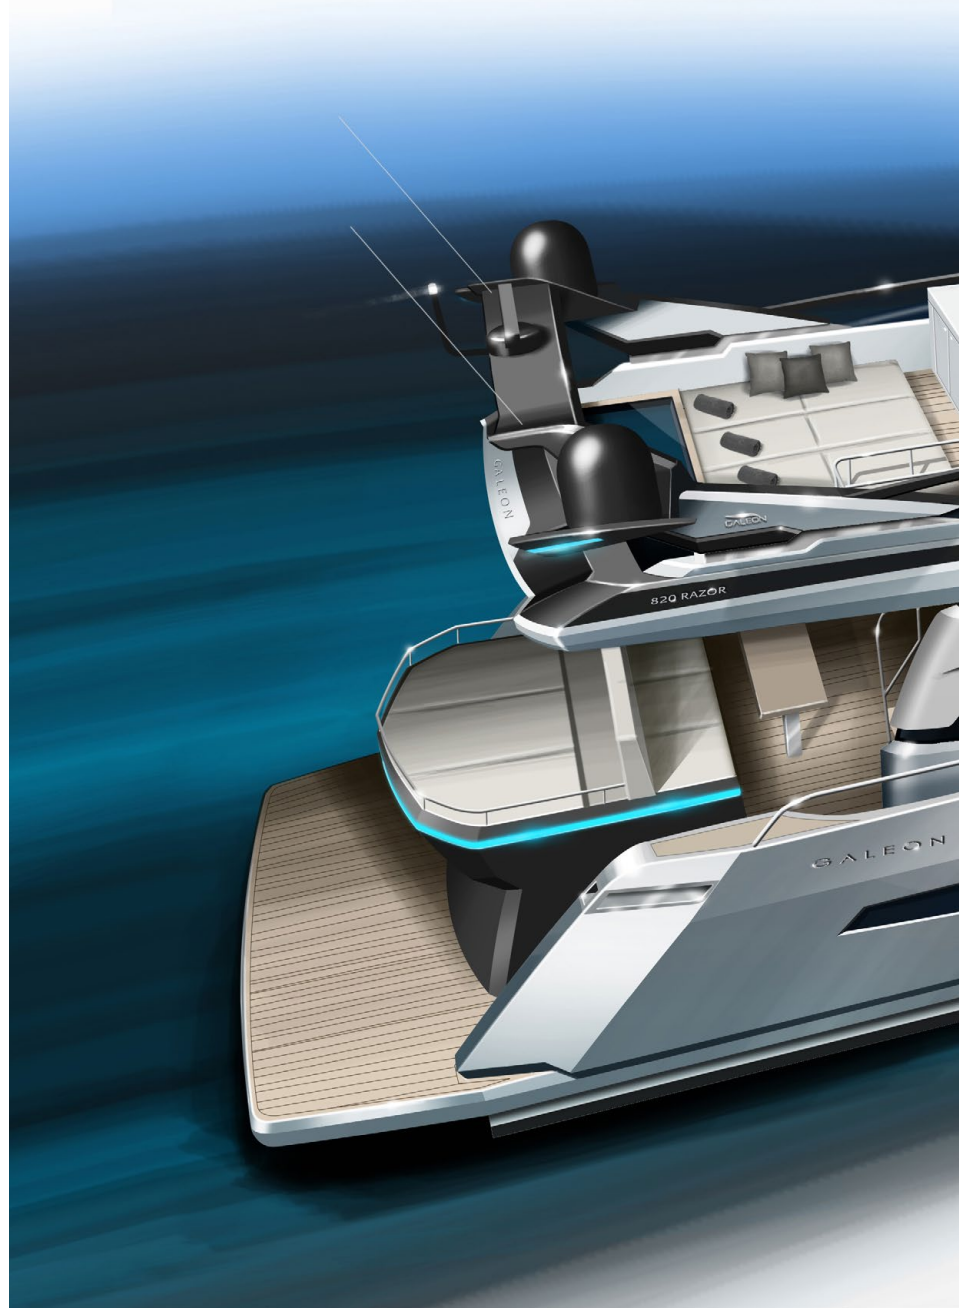

Galeon 820 Skydeck is set to be the breakout model that will firmly put the shipyard on the map of superyacht builders. Designed in cooperation with the acclaimed Tony Castro naval architects studio, it will display the technical prowess and uncanny level of attention to detail that has elevated the Galeon company into the very elite of European yacht makers. The 820 Skydeck will be a leap forward and offer more than just great looks and commendable performance – it will leave a lasting impression of excellence and refinement you’ve come to expect from a world class product.

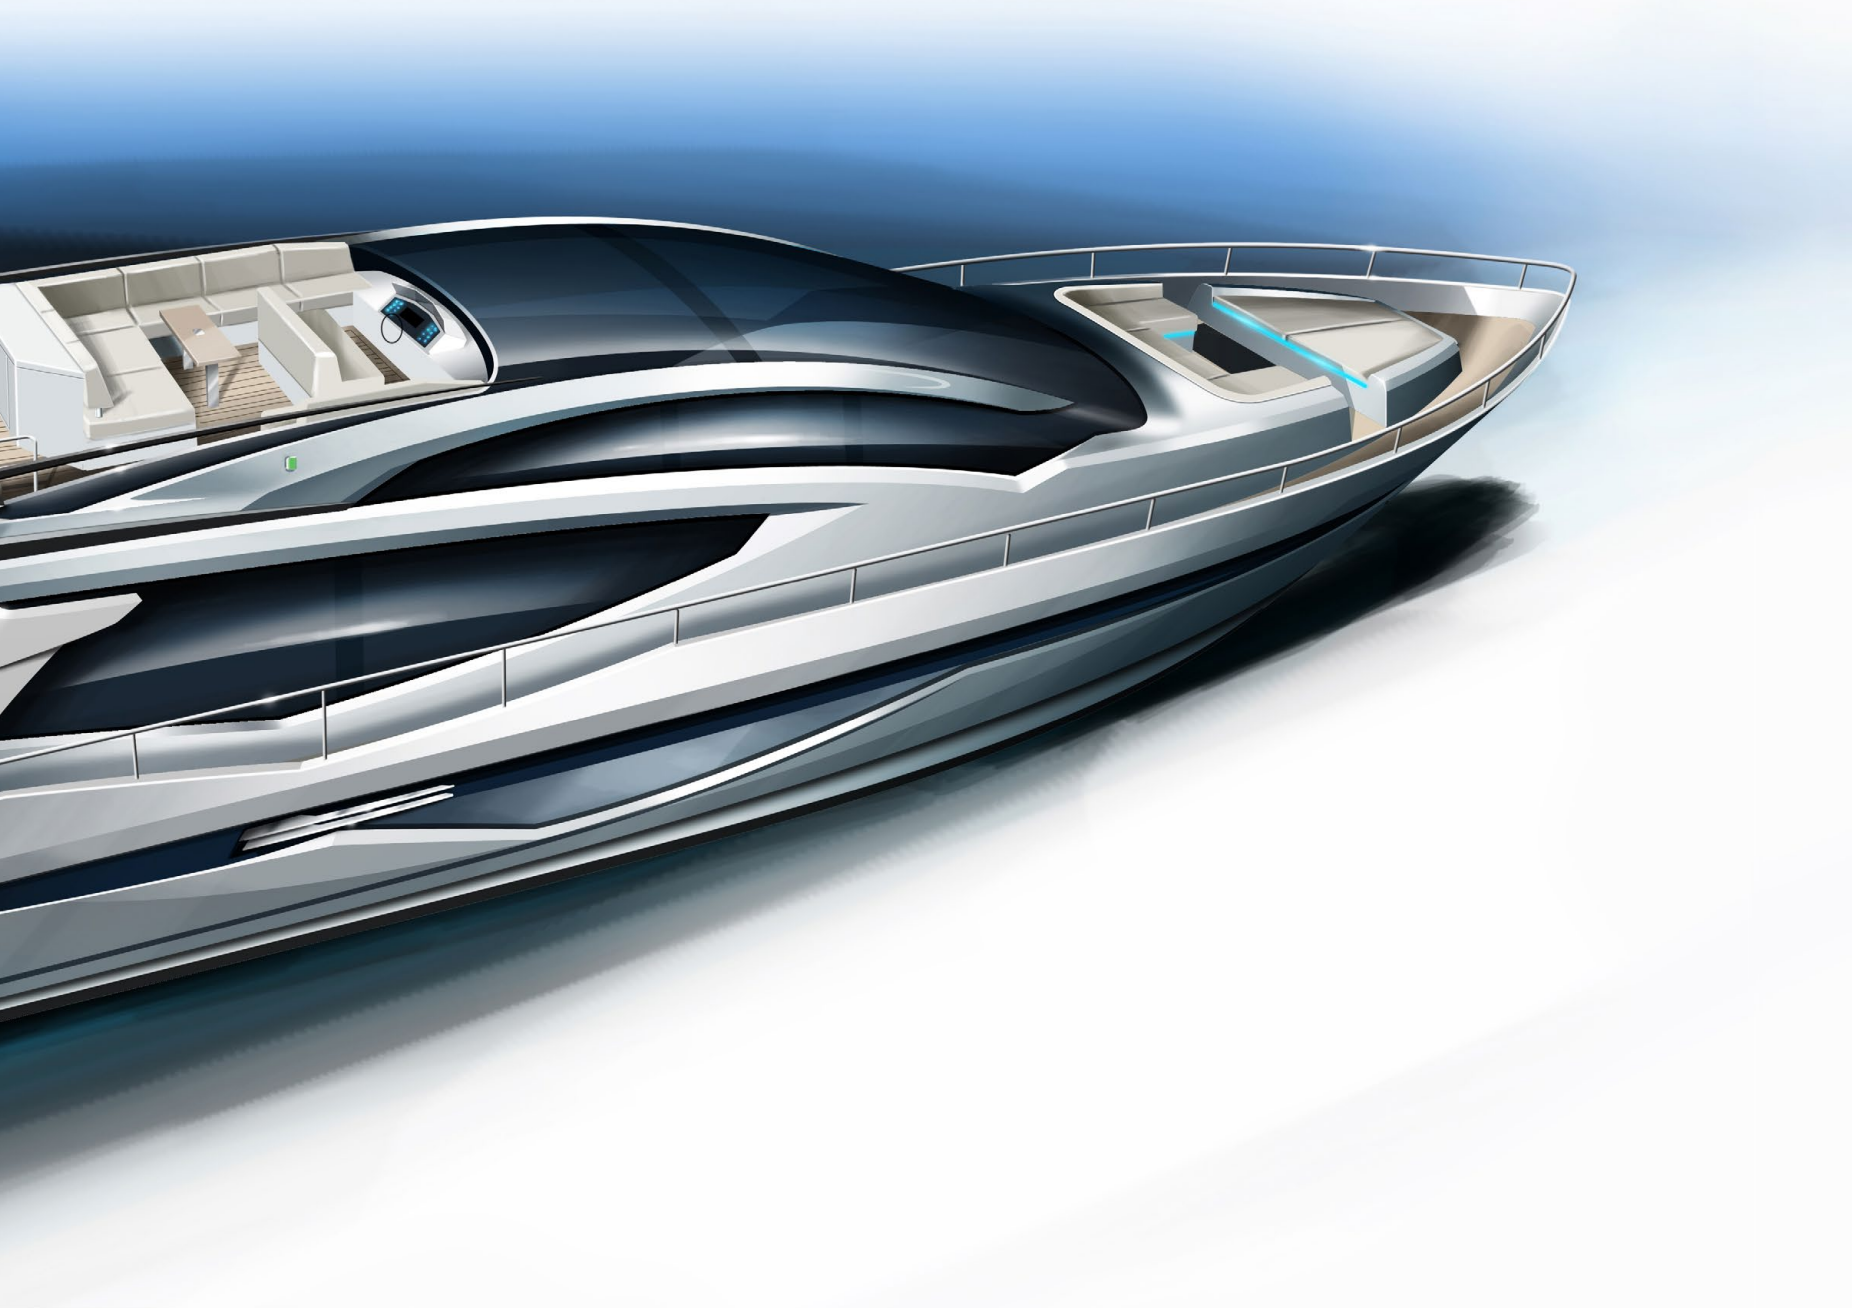

Following the design guidelines for all third generation Galeon yachts, the new flagship extends the boundaries of what was thought possible in terms of living space, craftsmanship and technical innovation. The extensive use of glass panels bathe the interior in natural sunlight and create a welcoming atmosphere. All three decks are filled with leisure and entertainment amenities to keep the passengers occupied while the crew handles the yacht from two independent helm stations.

820

SKYDECK

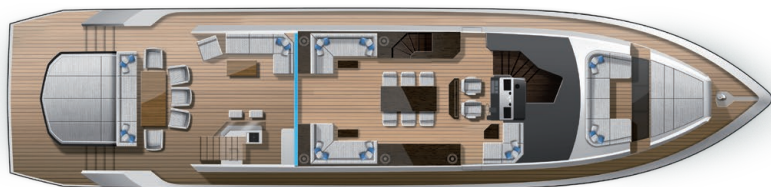

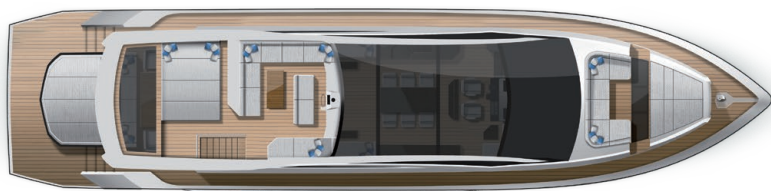

The amazing Skydeck feature combines the sleek and sporty design of a hardtop with the convenience of a flybridge. Plenty of sunbathing and respite areas are available on both levels along with two wet bars and a stunning retractable glass door system dividing the cockpit and the saloon. Every sport enthusiast will be thrilled to find a sizable hydraulic platform and automatic garage system in the aft area. The saloon is occupied by the leisure and dining areas with galley and guest quarters moved down below. Powerful MAN engines with up to 2 x 1920 hp will handle the yacht's performance while an array of navigational and electronic equipment will safely take it to its destination – wherever it may be.
